Ramesh Marahatta, MD

Growing up, Dr. Ramesh Marahatta always wanted to help people who were suffering. He was inspired at a young age by the service and professionalism a doctor embodied which influenced him to pursue a career in medicine.

About Dr. Marahatta

Dr. Marahatta chose nephrology because it is a challenging medical issue that deals with the whole physiology of the body. Dr. Marahatta loves working at Nephrology Associates because of the camaraderie, the family feel to the team and the opportunity to help people with complex and often ongoing medical issues.

Dr. Marahatta focuses on the preventative aspect of nephrology and strives to help patients by listening carefully to find ways to improve their health. He takes the time to educate patients on the disorders so they understand the issue and feel empowered to take ownership of their health.

About AVC

Advanced Vascular Centers offer the most current applications of existing techniques, including embolotherapy, interventional oncology, cutting-edge devices, and imaging technologies to provide the highest quality of care to patients.

Choose The Advanced Option

Compared to conventional open surgery, Interventional Radiology offers less pain, less blood loss, lower risk of infection, and faster recovery time. Patients go home the same day, and walk out just hours after their procedure. Procedures performed at AVC require only light or moderate sedation.
